

Table of Contents

1	Measuring to the Nearest Unit
2	Measuring with Customary Units
3	Measuring with Metric Units
4	Measuring to Scale
5	Customary Linear Units (Adding and Subtracting)
6	Selecting Best Unit (Customary and Metric)
7	Conversion of Linear Units (Customary and Metric)
8	Selecting Closest Equivalent Measure (Customary and Metric)
9	Conversion of Rates of Motion (Customary and Metric)
10	Selecting Best Measurement (Customary and Metric)
11	Units of Time (Adding and Subtracting)
12	Conversion of Units of Time
13	Time Zones
14	24-Hour Time
15	Customary Units of Mass and Capacity (Adding and Subtracting)
16	Conversion of Units of Mass and Capacity (Customary and Metric)
17	Conversion of Metric Units (Mass and Capacity)
18	Temperature Conversions
19	Uncommon Units of Measure (Conversion to Common Units)
20	Perimeter of a Rectangle
21	Area of a Rectangle
22	Area of a Triangle
23	Using a Protractor
24	Measures of Angles of Regular Polygons

25	Number of Diagonals of a Polygon
26	Measures of Angles of Triangles
27	Measures of Inscribed Angles
28	Volumes of Rectangular Solids
29	Measures of Interior Angles of Circles
30	Measures of Exterior Angles of Circles
31	Estimating Areas of Irregular Shapes
32	Circumference of a Circle
33	Area of a Circle
34	Right Triangle Rule
35	$30^\circ - 60^\circ$ Right Triangles
36	$45^\circ - 45^\circ$ Right Triangles
37	Tangent of an Acute Angle
38	Sine of an Acute Angle
39	Cosine of an Acute Angle
40	Lengths of Sides of Right Triangles
41	Lengths of Diagonals of Rectangular Solids
42	Properties of Spheres, Cones, and Cylinders
43	Properties of the Platonic Solids
44	Properties of Prisms, Antiprisms, and Pyramids
	Table of Sines, Cosines, and Tangents
	Table of Squares
	Table of Metric and Customary Measures
	Table of Metric/Customary Approximate Equivalents
	Answer Key
